KERALIT® Huf-Elast Hoof Care Oil

Hoof care concentrate: improves hoof elasticity and horn substance

The hoof absorbs shocks to the horse's musculoskeletal system and is highly subject to deformation. A hoof's elasticity mainly depends on the moisture content of the horn. Healthy horn on the hoof wall contains about 20% water. **Huf-Elast Hoof Care Oil** is a liquid concentrate with over 90% plant-based active ingredients including bay laurel, sesame and avocado oils in a water-soluble solution. The horn absorbs these nutrients and binds their natural moisture. This improves the horn's elasticity and resilience. Ideal for use in alternation with **Keralit Hoof Stabilizer**.

Application:

*Using a brush, apply sparingly to the hooves and coronet areas 2-3 times per week. For brittle, dry horn, wash hooves and apply **Keralit Huf-Elast Hoof Care Oil** to the still-damp horn. **Keralit Huf-Elast Hoof Care Oil** may also be applied in a 1:1 mixture with water.*

FN-ADMR: Skin 2 days, Horn 0 days

Due to its high percentage of natural oils, **Keralit Huf-Elast Hoof Care Oil** will thicken at about 5° C. Shake before using.

Colour and consistency may vary due to natural ingredients.

Contains no preservatives, colourings, or mineral oil components.

300 ml / 475 ml
