

EN:

KERALIT® Hufbad

**Concentrate for treating decay from white line disease/
seedy toe, hoof abscesses, laminitis, sole defects,
keratoma, and thrush.**

Instruction of use of KERALIT Hufbad:

Prepare a solution by dissolving the concentrate in water.

Concentration should be approx. 5%, i.e. 5 grammes of concentrate per 100 ml water. The total quantity of the solution will depend on the container in which the hoof is to be bathed.

Any visually recognisable damaged areas should be fully immersed in the solution. Horn damage is often found higher on the foot than can be seen with the naked eye.

Bathe the hoof for 10–15 minutes twice a week. The hoof should be predominantly dry and not oiled before treatment.

Using a medicine boot: approx. 250-500 ml

Using a bucket or tub: approx. 1000-2000 ml

Can cause skin irritation. Can cause serious eye irritation.

IN CASE OF CONTACT WITH SKIN: wash thoroughly with soap and water. IN CASE OF CONTACT WITH EYES: Rinse carefully with water for several minutes. Remove contact lenses if possible.

Continue rinsing.
