

EN:

KERALIT® Lorbeer-Salbe

Hoof and coronet care.

Improves hoof growth, keeps horn and corona elastic.

Maintains circulation and water balance.

KERALIT LAUREL OINTMENT is a nourishing and effective combination of natural ingredients with a water-friendly cosmetic base. Its water solubility ensures no impediment to moisture balance in the horn. Regular use will make the horn more elastic and improve the hoof mechanism, increasing blood circulation to the dermis and improving horn growth.

Application:

*2-3 times per week. Wash hooves and coronets. Apply a thin layer of **KERALIT LAUREL OINTMENT** to the still-damp horn and the coronet. Rub in by hand or carefully with a soft brush. Washing beforehand is not necessary but recommended for brittle, dry horn. Remove sand or other particles before application.*

FN-ADMR: Skin 2 days, horn 0 days

KERALIT LAUREL OINTMENT contains 20% bay leaf oil. Store in a cool place. Keep container tightly closed after use.

Colour may vary due to natural ingredients.
