

E:

KERALIT® FROG-LIQUID

For care and regeneration of damaged frog horn.

KERALIT® STRAHL-LIQUIDIE prevents horn decomposition processes in the frog area.

Instructions for use:

Cut off the nozzle end to open. Keep red cap to close bottle for later use. Clean and dry frog clefts thoroughly before treatment. Ideally wrap a small cloth over a wooden spatula and wipe out the cleft several times to remove loose horn. Apply Strahl-Liquide to the frog clefts 1x daily at first, then every 2-3 days after noticeable improvement. Keep hooves dry, observe good stable hygiene. Application 1x weekly suffices für preventive care.

May cause skin irritations. May cause allergic skin reactions. Wear protective gloves and eye protection. Wash hands thoroughly after use. May irritate airways, keep out of reach of children. Avoid inhaling aerosol fumes. In case of contact with skin or eyes, rinse thoroughly with water. Seek medical assistance in case of irritation to skin or eyes. Contains the following hazardous substances: glutardialdehyde.
