

**EN:**

## **KERALIT® Undercover**

### **Conditioning paste to prevent keratin degradation**

Helps prevent degradation at the inner walls (white line disease), frogs, soles and bars as well as hollow hoof walls. Compatible for use with orthopaedic shoes with inserts and silicone pads. Protects throughout the entire shoeing period. Easy to use.

#### ***Instructions for using Keralit Undercover:***

***During shoeing:*** Remove loose, rotting horn material, particularly from the buttress of the heel, white line and clefts/grooves. Fill the resulting cavities with the paste. Nail on shoes as usual. For shoeing with plates and silicone inserts, apply also to frog and sole.

***For horn degradation in frog area:*** Pick out the grooves until clean and apply Keralit Undercover with a spatula, pressing firmly into the deep groove/cleft areas. Repeat after 2-3 days.

Can cause skin irritations, severe eye irritations. In case of contact with skin wash with water and soap. In case of contact with eyes rinse thoroughly with water. Keep out of reach of children.

If swallowed: call the emergency number 112. For external use on horn and hooves only.
