

**KERALIT®**  
**UNDERCOVER**

Effective for hoof problems such as **white line disease, wall degradation and thrush** as well as to improve the condition of keratinised cavities, e.g. in the case of hoof abscesses. Ideal in wet weather conditions.

Prevents **horn degradation on the white line, sole, bars and hollow hoof walls, especially under the shoes**. Ideal for horses with orthopaedic shoes/shoes with plates. Protects between farrier appointments.

Instructions for use:

For **thrush**: Clean the frog grooves without getting them wet, apply Keralit Undercover with a spatula and press into the deep grooves. Repeat after 2-3 days.

During **shoeing**: Remove loose, rotting horn material from the collateral and central grooves of the frog and the white line. Fill the resulting cavities with the paste. If the shoes have plates, apply an additional thin layer to the frog and sole. Nail on the shoes as usual.

**WARNING**

Causes skin irritation. Causes serious eye irritation. Keep out reach of children. Wear protective gloves and eye protection/face protection. IF ON SKIN: Wash with plenty of water and soap. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If skin irritation occurs: Get medical advice/attention. For external use on horn/hooves only. If swallowed call a poison centre immediately: emergency number +49 (0)30 30686700 Charité Poison Control Centre Berlin
